## BANKSY

*Ultra-flat  
front mounted display*

Visual & Media Systems

V1.3  
*English*

## Description

**BANKSY** is an ultra-flat front mounted position indicator for elevator cars and halls, and it comes in three different models:

**DB1** (55x55 mm) > Perfect retrofit for older DMG D1 series displays.

**DB2** (68x71 mm) > Larger version of the DB1, only in the screen size.

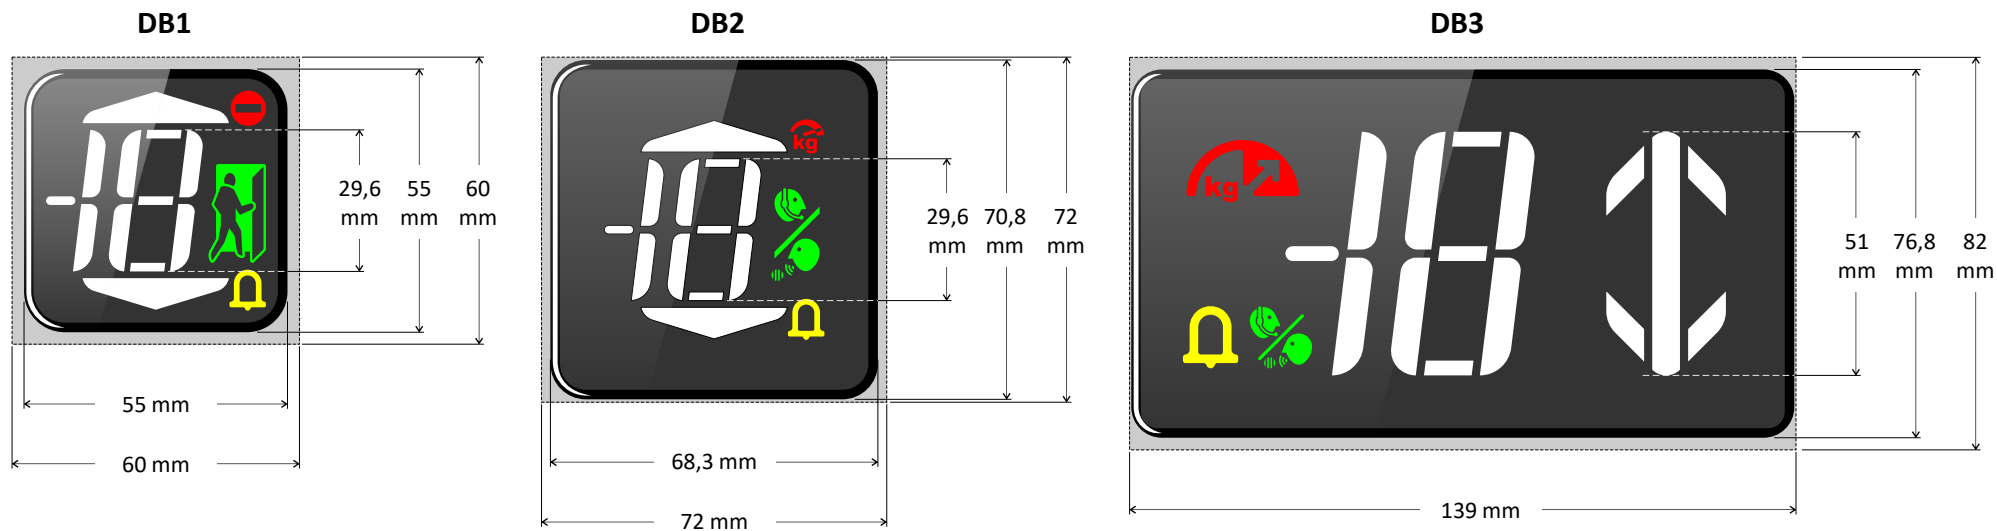

**DB3** (139x77 mm) > Compatible with DMG's DZ3 front mounted displays.

This is the bigger version allowing to comply with the EN81-70 standards.  
A capacity plate is also available (same size, not illuminated).  
JST connection for Pitagora 4.0 prewiring.

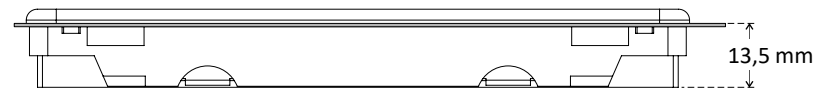

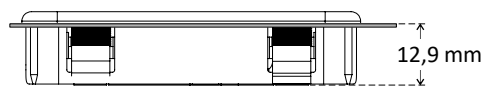

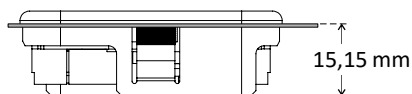

All Banksy indicators are available in 2 versions:

- with car symbols (EN81-28:2018): alarm sent, communication established, overload.
- with hall symbols: alarm, car here (only 55x55 and 68x71 versions), out of service.

## Dimensions

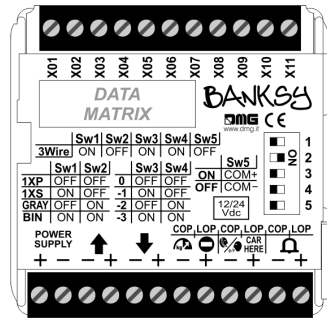

**BANKSY** can be mounted on plates 0,7 ÷ 3 mm thick.

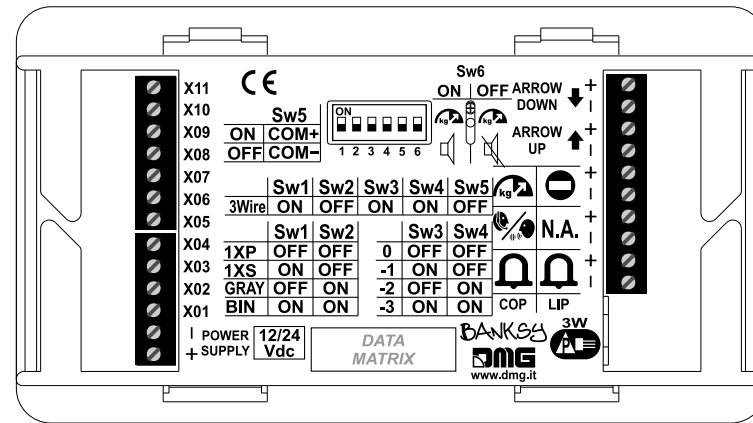

## Settings and connections

### BANKSY DB1 / DB2

### BANKSY DB3

### CTDB3 PLATE

The capacity plate has the same dimensions of the DB3 indicator, it is not illuminated and all elevator's data can be customized by the user and printed on a film.

## Technical features

Floors display	from -9 to 19
Power in	12/24V DC
Inputs	11 position inputs can be selected by a dip-switch + service symbols inputs according to EN81-28
Coding	3 wires serial DMG / 1 line per floor / 1 line per segment / Gray code / Binary
Settings	Offset (0, -1, -2, -3) / Buzzer (only for DB3 Banksy)
Absorption	7mA per segment (12V), 10mA per segment (24V) Arrows UP/DW: DB1/DB2: 14mA (12V), 20mA (24V) / DB3: 22mA (12V) 22mA (24V) Inputs: DB1/DB2: 10mA (12V), 21÷48mA (24V) DB3: 8÷11mA (12V), 17÷18mA (24V) Buzzer (DB3): 14mA (12V), 15mA (24V)
Operating temperature	-10°C ÷ +50°C
Protection	IP4x
